

AlsoEnergy Portfolio Aggregation Solutions

AlsoEnergy aggregates data from existing sites without installing new hardware

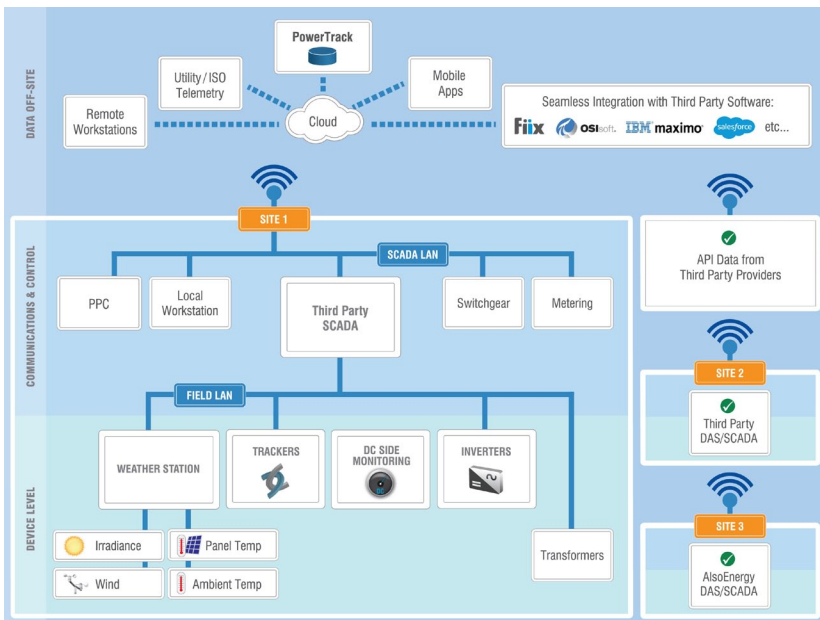

- Streamline business processes in a single enterprise application
- Manage performance alerts and stakeholder reports for all assets using PowerTrack
- Get a single data source for record keeping, compliance tracking, and CMMS/O&M management
- Easily integrate fleet data in PowerTrack with third party software for asset management, CMMS, ERP, and CRM
- Leverage AlsoEnergy experience to find the most cost-effective aggregation solution for each system
- AlsoEnergy will work with your existing site hardware and software providers

Lower your costs and improve efficiency by standardizing on a complete application for asset management and operational oversight.

- Performance analysis & diagnostics
- Expert performance modeling
- Integrated asset management
- Integrated CMMS
- Financial analysis and reports
- Mobile applications
- Control room video wall solution
- Design your own displays and reports

End-to-end solutions from AlsoEnergy provide the convenience and security of a single source provider for hardware, software, services, and support over the project lifecycle. PowerTrack features include advanced performance analytics and diagnostics, integrated CMMS job ticketing, and fleet management tools for asset managers such as reports, KPI displays, and invoicing.

Portfolio Aggregation Fact Sheet

- In most cases, data can be acquired from operating portfolio assets without adding new hardware
- Aggregation solutions may include direct communication with existing DAS or SCADA hardware, as well as API integrations with your existing software providers
- Aggregation solutions may be used for acquired legacy assets as your company grows

Aggregation Process Workflow Summary

- Submit your complete site and provider list
- AlsoEnergy Project Manager is assigned
- Historical data migration options are available based on client requirements
- Various items may be needed including most recent SLDs and API login keys
- Client sign-off process on each site

AlsoEnergy is an ideal long-term partner for growing companies:

- Complete best-in-class solutions for residential, commercial, and utility-scale PV
- Specialized solutions for storage and wind systems
- Offices across the US, Europe, and Asia
